Sunshine is an aid to health—until it becomes so hot it is an aid to the doctor.

Prohibition, we are assured, is creating a void in the jails of the country—ditto the stomachs of its citizens.

To escape the piker class, voted should advance in price also.

The News while it is News—Read The Ontario Argus.

SUNFLOWERS ARE COMING SILAGE CROP
Over in Wallowa county they are going strong on silos and sunflowers to put in the silos. The motto is "A silo on every farm." Of course their conditions are not just like those of the irrigated sections of Malheur county, but there is a resemblance between the conditions there and in the range country in this county, in that here is need for more winter feed for livestock and the elevation makes the season too cool for growing corn successfully for silage. In other words, sunflowers will grow where it is a little too cool for corn.

The best place to try out this new crop is on the sub-irrigated creek bottoms of the interior country. Sunflowers are great rustlers after water—they root deep. Where there is a rich creek bottom they are likely to turn off an immense crop. Some of the Wallowa experimenters raised more than 20 tons per acre. They figure that two tons of the silage is worth one ton of hay, so it is easy to see why Wallowa which can raise only three to four tons of hay per acre on the average, is going to keep more stock at home for feeding after the thousand silos are built and filled with sunflowers.

RHEA LUPER
ASSISTANT STATE ENGINEER WHO IS A CANDIDATE FOR PUBLIC SERVICE COMMISSIONER
In practically all cases before the Public Service Commission, an engineer's judgment and advice is required.
RHEA LUPER is an Eastern Oregon Engineer whose fairness and ability has been demonstrated.

INVEST in one of THE WEST'S GREATEST INDUSTRIES—

IDAHO POWER COMPANY 7% PREFERRED STOCK

Become an investor in the progress of the west's greatest states, Idaho and Oregon, by investing in Idaho Power Company 7 Per Cent Cumulative Preferred stock.

A MOST ATTRACTIVE INVESTMENT

This is one of the safest and most attractive investments on the market today, for our 10 big electrical generating plants serve industries and homes of 60 communities and their adjacent farms and mines. You become a part owner of our huge system which covers the entire southern part of Idaho and runs into Oregon on the west and Nevada on the south. We generate electricity at the following hydro-electric power plants which are situated at Ox Bow, Oregon, and Horseshoe Bend, Barber, Swan Falls, Malad River, Lower Salmon, Thousand Springs, Shoshone Falls, American Falls, and Arrowrock, Idaho.

MORE THAN 31,000 CUSTOMERS

We are now serving more than 31,000 customers, an increase of 60 per cent in the last four years. During 1919 the Idaho Power Company supplied power service for pumping water to irrigate about 90,000 acres of land, and the pumping of water for irrigation, next to the railroads, has been the most important factor in the upbuilding and growth of Idaho. We supply the power for the operation of the interurban and city electric lines operating out of Boise, Nampa and Caldwell.

A NECESSARY PRODUCT

Our product is a vital necessity in this great irrigation, mining and timber country. Without electrical energy thousands of fertile acres would be desert; great wealth producing mines would be practically valueless; enormous flour mills would have to seek elsewhere for power, and thousands of Idaho homes would be without electrical conveniences.

BUY ON PAYMENT PLANS

Idaho Power Company 7 Per Cent Cumulative Preferred Stock can be purchased for \$100 a share plus the accrued dividend to date of payment for stock, or on a ten payment plan of \$10 per share monthly. While buying your stock you receive 6 per cent interest on the partial payments.

Management of the Idaho Power Company is very conservative, and by investing in its Cumulative Preferred Stock you receive 7 per cent per year, payable quarterly, for money loaned to a business already substantially and permanently established, yet having a large field of growth.
